ESPECIFICACIONES

Steel base “soft touch” effect painted; stem covered by a natural platinic silicone sheath (anti-yellowing); diffuser in transparent polycarbonate with rubber-effect coat; transparent lens; internal reflector made of specular aluminium with random perforations. The new internal diffuser is reinterpreting the old fluorescent lamp using a modern LED source, this guarantees the same optical performance with less power consumption and a better quality of light. In the WHITE INTEGRALIS version, Pipe is designed to offer a white emission ensuring perfect perception while respecting the human presence and which at the same time combines control of microbial growth. It can vary in intensity and is available with a fixed CCT of 5000K, with a high color rendering index (CRI 90).
