## ESPECIFICACIONES

El Porís is a modern, graphic, rigorous chandelier, yet one that is also truly spectacular and sculptural. Introduced in 2021, it is now also available in a smaller version, which is perfect not only for large spaces but also for applications in settings with less impressive heights.

In both versions, a large elementary, geometric structure features light bulbs housed in traditional E27 sockets, leaving complete freedom of choice as to what sources to use.

Calendared steel tubes of decreasing diameter are joined by four vertical mounts. The simplicity is immediately apparent, revealing design and production know-how that can solve the complexity in elements and details that disappear into the main structure.
